EXPERIENCE

SAP, Palo Alto, CA

June 2025 – Present

UX Researcher

- Improved SAP Mobile Design System satisfaction by **12.6%** and helped prevent **8 weeks of rework** by identifying usability, guidance, and accessibility gaps across research with **184 participants**.
- Shaped SAP Joule and mobile AI interaction patterns for enterprise workflows serving **425K+ customers** by conducting mixed-methods research across end-user, admin, and technical-user experiences.
- Informed an AI-powered Help & Support panel concept by synthesizing **74 support resources, 21 interviews, survey findings, and 4 workflows** to uncover diagnosis, abandonment, and recovery breakdowns.
- Defined AI interaction guidelines for Joule Voice by evaluating **6 enterprise voice-AI use cases** and aligning PM, Design, Engineering, and AI stakeholders on requirements for trust, visual confirmation, recovery, and editability.
- Influenced research strategy across mobile, AI, and support workstreams by translating findings into reusable frameworks, journey maps, and recommendations for enterprise AI interaction patterns.

ClariMed, San Jose, CA

Jan 2025 – May 2025

Human Factor Intern

- Measured a **25% reduction in safety-critical errors** by leading comparative usability testing of a heart-rate tracker paddle with **5 participants across 12 workflow tasks**.
- Translated **82+ usability findings** into engineering recommendations by synthesizing **8 hours of endoscope testing** to identify manual comprehension gaps and workflow risks.
- Supported safer injector-system design decisions by evaluating hardware workflows through comparative analysis and identifying usability bottlenecks in a regulated medical-device environment.

San Jose State University, San Jose, CA

Sep 2023 – May 2025

Graduate Student Research Lead

- Produced award-winning autonomous vehicle research by studying semi-autonomous takeover experiences for users with hearing impairments, resulting in the first study focused on this population and a **Best Video Award at AutoUI**.
- Improved user response times by **15%** by evaluating trust calibration, mental states, and human-machine interaction across high-load takeover scenarios including lane-changing and lane-keeping tasks.
- Managed research operations for **100+ participants** across concurrent industry-sponsored studies with **Honda and Amazon**, coordinating participant pipelines, study logistics, and data collection.

University of California, Santa Cruz, Santa Cruz, CA

Sep 2021 – May 2023

Research Assistant

- Improved conversational AI design guidance by analyzing **247 participant responses** across human and voice-assistant conditions, identifying when agents should use autonomy-respecting strategies over human-like closeness strategies.
- Evaluated voice assistant politeness patterns across **2 norming studies, 2 experiments, and 16 strategies** by measuring cooperation, autonomy, appropriateness, and user experience.
- Led 5 research assistants across multi-study execution by standardizing participant protocols, task delegation, and data-quality checks across 100+ participant sessions.

EDUCATION

San Jose State University, San Jose, CA

Aug 2023 - May 2025

Master of Science in Human Factors and Ergonomics

University of California, Santa Cruz, Santa Cruz, CA

September 2021 - May 2023

Bachelor of Science in Cognitive Science

SKILLS

Research Methods: Mixed-methods research, usability testing, interviews, survey design, concept testing, heuristic evaluation, competitive analysis, workflow analysis, literature review

UXR Strengths: Enterprise UX, AI interaction research, design systems, accessibility, research synthesis, stakeholder alignment, research operations, regulated-product research

Data Analysis: R, SPSS, survey analysis, qualitative coding, thematic analysis
